

Information of Used Tank, Equipment & Truck
Important! Read carefully, Fill in All Blanks, Send Photographs

New Department of Transportation (DOT) regulations are now being enforced in many states. It is only a matter of time until they will be enforced in all states, resulting in many trucks in use today becoming illegal.

DOT regulations require that all dealers have in their possession a copy of the original Manufacturer's Data Report for each truck. If the Manufacturer's Data Report has been lost and the company that built the tank is no longer in business, it may be impossible to obtain a duplicate copy.

DOT regulations also require that the tank have an MC-306 or MC-406 plate, near the front head seam. This item is very important! We must know if you have a data report and if the tank has the words "MC-306" or "MC-406" on a plate. Thank you.

Tank Mfg. By: _____ Size _____ Year Built _____
Serial # _____ Does tank have stainless plate with word MC-306? _____
Main Tank Valve: Brand _____ Size _____
Controls? _____ Domelids? _____ Vents? _____ Type of Pump? _____
Reel: Brand _____ Electric or Manual? _____
